

PULL WAND MOTOR PROGRAMMING GUIDE

CHARGING INSTRUCTIONS

IMPORTANT: Blind will not operate while plugged in. You must disconnect the charging cord to use.

We recommend operating the blind at least once a day for better maintenance and longer lifespan of the motor. Operating the blind once per day, the battery of the motor should last 4 to 6 months. When the battery is low, the motor might run slower than usual and will beep during operation. To recharge the motor, attach the charger cord to the port located on the head of the motor and plug it into the current for up to 6 hours. After a 6 hour charge, remove the charger cord; do not leave plugged in overnight.

MANUAL PROGRAMMING

1 Adjusting limits

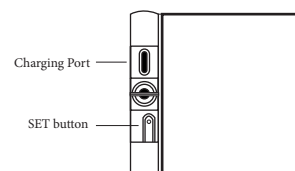

NOTE: Adjusting the upper or lower limit cannot be done individually. Both have to be adjusted and set each time we enter setting mode.

• Set Bottom Limit:

Press and **hold SET** for **MORE than 6 seconds**, the motor will beep and enter setting mode. Pull wand to test direction first. If the shade is moving downward, just **hold** it to the desired bottom limit position. If the shade is moving upwards, **release** the wand and **pull it again** so that it moves downward. Continue to **hold** until shade moves to desired bottom limit position. **Short pull** the wand to fine tune the bottom limit position. **Press SET**, the motor will beep and the bottom limit is now saved.

• Set Upper Limit:

Pull wand and **hold** to move the shade upwards. Continue to **hold** until desired upper limit position. **Short pull** to fine tune the position if needed. **Press SET** and the motor will beep twice confirming the upper limit.

2 Jog/Continuous Mode Switch

You can switch between smooth continual operation or jog mode. Press **SET 6 CONSECUTIVE TIMES**, the motor will beep twice and switch from one mode to the other.

DIGITAL APP PROGRAMMING

1 Download and install the 3L Smart Blinds App

You can find it in your app store entering "3L Smart Blinds" or with the following QR codes

IOS

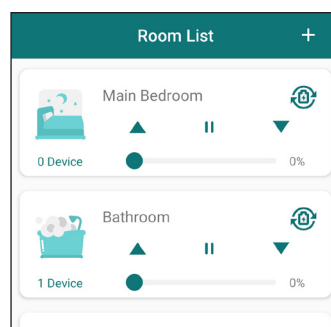

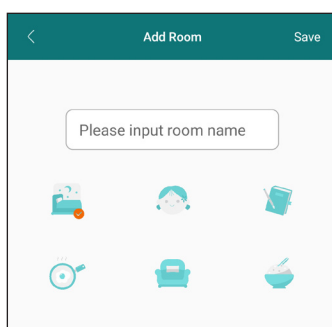

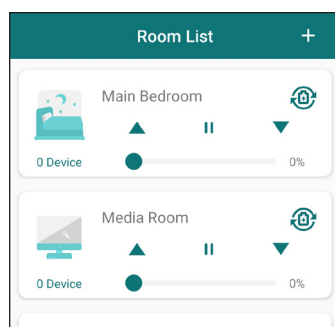

ANDROID

Once installed, open the app and accept necessary permission. Make sure your Bluetooth connection is on and available to find and connect to other devices.

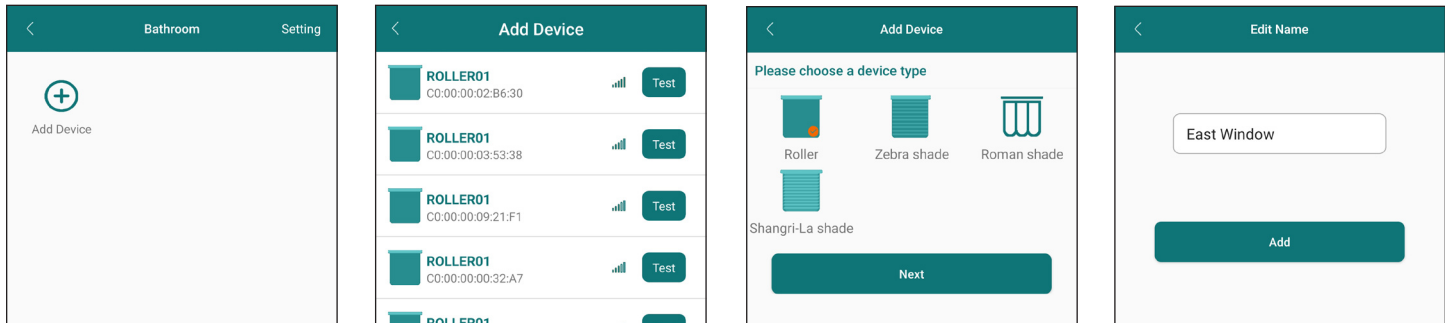

2 Add Rooms

Select one of the pre set rooms by pressing on the room icon or add a new room by pressing "+" on the upper right corner. Select the icon and name for the new room and save. Then press on the icon of the room where the blind you are about to program is in.

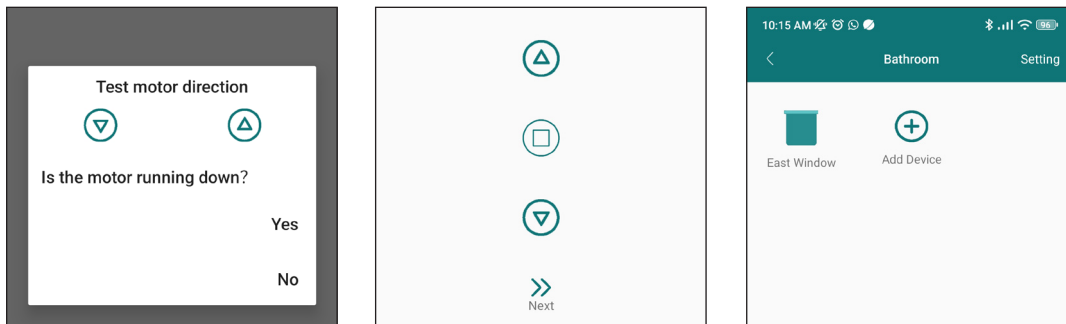

3 Add Devices (Blinds)

After selecting the room press "Add Device". All available blinds will appear by proximity. If your device does not appear, Press SET button on motor head 3 quick times. Press "Test" to confirm the right blind is selected, a beep will come from from the blind. Press on the blind to add it. Select type of blind and name.

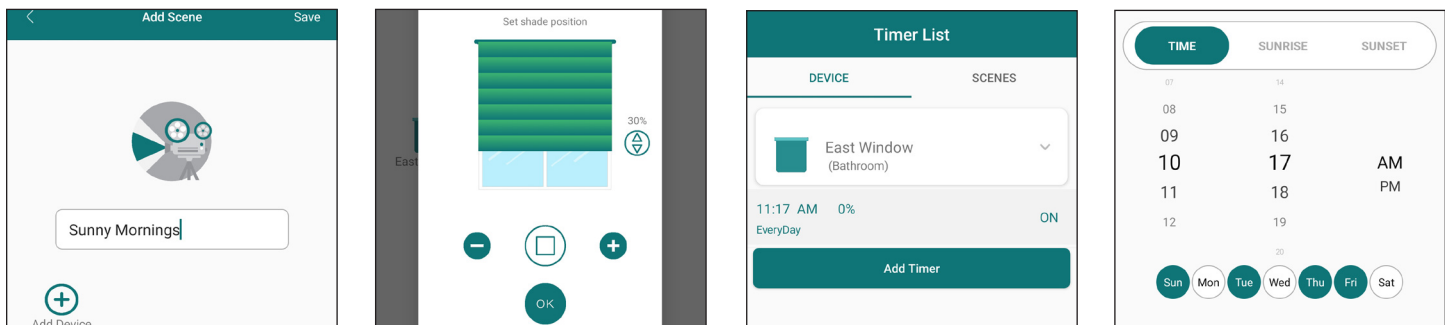

You will now be able to test the direction of the movement of the blind and change it if necessary. Then follow the instructions to set the operating range. Select your lower and upper limits and click next. The blind will now show up in the room page and can be controlled by clicking on it. Yo can also control all the blinds in a room at the same time from the room menu.

4 Add Scenes & Timers (Optional)

SCENES: You can add custom positions to a blind or a grouping of blinds fromthe Scenes Menu. Press + to create a new Scene. Name it and change the icon if you wish. Press Add Device to add blinds linked to the Scene. Select the position of the blinds for the scene. Press Save.

TIMERS: You can set specific movements for a blind or grouping of blinds at certain times of the day and certain days of the week. You can also link specific scenes to a timer. Go to Timers menu. Select DEVICE for individual blinds, or SCENES for groupings of blinds at specific positions you have already set. Select the blind or scene you want to put a timer on. Press Add Timer. Selectf the time of day and days ofthe week you want the timer working and the desired position of the blind. press Save.
